

As a resident of Placer County, I feel very blessed to have a wonderful choice of a radio station like KLOVE which is broadcast to our community offering a family based format that is safe for my entire family to listen to...this station uplifts me every single day and I would feel lost without being able to listen.

Our community would be effected deeply if KLOVE were to be displaced by an LPFM broadcaster as we would lose our choice to a wonderful radio station and the services provided by KLOVE would be lost to an entire generation which so desperately needs the messages found in their format especially in this day and age and especially for our young people.

We need to be able to have choices in our radio stations for the entire listening public audience. Replacing KLOVE would make us lose this wonderful gift.

Please consider allowing this safe and generous station that offers such a versatile and wholesome listening range for us decent, hardworking people to remain on the air for now and for generations to come.

Thank you.
